

IVanish - 1st Impression

I had a chance to view Bob Kohler's IVanish for the 1st time today. As I've often said - he writes the best ad copy since Jeff Busby. Sometimes the trick is worth it - sometimes not. This may well prove to be of the former variety.

Generally, I'm not a big fan of single trick DVDs as they tend to be over-priced and over-hyped. Bob has priced this right at \$25.

The explanations are excellent. Well photographed and carefully described. If I have a nit, it's that the trick is probable more subject to angles than implied, but that is true of much modern coin magic.

Time will show its worth.

Take care.....
