

Any ugly warts?

We just upgraded to WordPress 2.3.

Everything seems to be running fine, but I always worry about latent problems. Please let me know if you see anything that doesn't seem right.

Take care.....

Computing For Magicians - Evernote

I make my living " if you could call it that " from computers. I know and like good software. I love software that is good and free!

One of my most indispensable programs is Evernote. If you use the Internet, at all " you need this program. You can save anything you see " take notes " create todo lists " capture images " all with just a couple of clicks.

In looking over the things I've saved over the years in Evernote, I most enjoy the pre-censored Cafe threads. Once in a while " frequently actually " you see a thread that you know is going to get either trashed or *revised* to the point it no longer retains ANY flavour of the original.

Trust me on this and try it.

Take care.....
