

Why is Bill Gates RICH!!!!

Damn if I know. I've been in the process of converting a machine to Vista. What a nightmare.

I spent most of the weekend and today just trying to get it to behave as well as XP. I see No - ABSOLUTELY NO - reason to buy this thing. There are a couple of cool visual effects and it's a little more intelligent in some processes, but that, in no way, makes up for the incredibly lame security implementations.

By the way, just in case you think the ol' i/m is crashing a little ahead of schedule, I'm doing this as a learning experience. I have customers that use it and I need to have a working knowledge.

Take care.....

Live like you're going to die tomorrow. Learn like you're going to live forever.

Computing For Magicians - Evernote

I make my living " if you could call it that " from computers. I know and like good software. I love software that is good and free!

One of my most indispensable programs is Evernote. If you use the Internet, at all " you need this program. You can save anything you see " take notes " create todo lists " capture images " all with just a couple of clicks.

In looking over the things I've saved over the years in Evernote, I most enjoy the pre-censored Cafe threads. Once in a while " frequently actually " you see a thread that you know is going to get either trashed or *revised* to the point it no longer retains ANY flavour of the original.

Trust me on this and try it.

Take care.....
